EDUCATION

Alliance University (CGPA: 8.9/10)

Bachelor of Technology in Computer Science, Minor in Artificial Intelligence

Karnataka, India

September 2022 – May 2026

TECHNICAL SKILLS

Programming Languages: Python, Java

Machine Learning & AI Frameworks: Pandas, NumPy, TensorFlow, Keras

Databases: MySQL

Tools & Platforms: GitHub, Linux

Core Concepts: Artificial Intelligence, Machine Learning

EXPERIENCE

Artificial Intelligence Intern

EduNet Foundation

April 2025 – May 2025

Remote

- Gained practical experience in developing deep learning models for image classification using CNN.
- Worked on a wildfire detection project, focusing on image preprocessing, model training, and deployment.

CERTIFICATIONS

Advanced Prompt Engineering for Everyone

[View Credentials](#)

CertNexus Certified Artificial Intelligence Practitioner

[View Credentials](#)

Cloud Fundamentals

[View Credentials](#)

Microsoft Certified: Azure AI Fundamentals

[View Credentials](#)

Machine Learning with Python(IBM)

[View Credentials](#)

Generative AI with Large Language Models

[View Credentials](#)

PROJECTS

AskMyFile | *Python, Streamlit, FAISS, Hugging Face, Google Gemini API*

[📄 GitHub](#) | [🔗 Demo](#)

- Developed a file-based RAG chatbot using Streamlit, enabling users to upload PDF, Word, Excel, CSV, PPT, JSON, and TXT files and interactively query their content.
- Implemented semantic search with FAISS and Hugging Face embeddings, integrated Google Gemini LLM to provide accurate, context-aware answers with relevant source references, improving document comprehension.

AI Resume Analyzer | *Node.js, Express, Supabase, HTML, CSS, Google Gemini AI, Render*

[📄 GitHub](#) | [🔗 Demo](#)

- Engineered a full-stack AI-powered web app to analyze resumes against job descriptions, highlighting missing and matching keywords.
- Calculated relevance scores and provided actionable suggestions, enabling candidates to optimize resumes for higher ATS shortlisting rates and integrated Node.js backend, Supabase database, and Render hosting.

Forest Fire Detection | *Python, TensorFlow, Keras, Matplotlib, Seaborn, Gradio*

[📄 GitHub](#)

- Developed a CNN-based wildfire detection system using TensorFlow and Keras, incorporating image preprocessing techniques to enable early forest fire identification and faster emergency response.
- Evaluated model performance using precision and F1-score metrics and deployed a real-time inference interface for live detection.

HACKATHONS AND CHALLENGES

- Finalist Progint's Computer Vision 2K23 National Hackathon
- Participated in Flipkart Grid 5.0
- Participated in Amazon ML Challenge 2024
